

Community Health Workers in Enhanced Care Management and In Lieu of Services: *A Model of Care Resource*

A Project of the California Health Care Foundation

Prepared By: Health Management Associates and In-Sight Associates

Community Health Workers in Enhanced Care Management and In Lieu of Services: A Model of Care Resource

Purpose

This document was developed as a resource for Managed Care Plans completing the CalAIM Model of Care Template. The chart that follows indicates the potential role that community health workers (CHWs) contracted via established local organizations can play in the Enhanced Care Management (ECM) Core Services and In Lieu Of Services (ILOS).

This document provides insight into:

- ▶ how CHWs can support outcomes, produce data, and build relationships necessary for program delivery and reporting
- ▶ how CHW services align with billable encounters

Audiences

Appropriate audiences for this resource include:

- ▶ Managed Care Plans (MCPs)
- ▶ Community Based Organizations (CBOs) and primary care and behavioral health Providers incorporating a CHW into their ECM care team or ILOS services
- ▶ CHW training entities

Development

This resource was produced by Heidi Arthur, Laura Collins, Lauren Ohata, and Nayely Chavez (Health Management Associates) and informed by Shannon Mong (In-Sight Associates) for the California Health Care Foundation (CHCF) *Community Health Workers & Promotores in the Future of Medi-Cal* project. This material was based on the Draft CalAIM Model of Care Template, which was released for public comment in June 2021. It has been reviewed by members of the project's Stakeholder Group who provided input on the needs of the CHW workforce in California and MCP needs related to CHW integration.

Chart Structure

For each core ECM service component, the chart identifies the key function(s) involved, the function a CHW could perform, the specific potential CHW role and responsibilities, and whether such capacity must be present when the CHW is hired or can be developed via training and supervision. ECM/ILOS functions will not be the sole function of a CHW, but will instead be conducted by a team, with a lead Care Manager (CM) who can be supported by a CHW. In some cases, the lead CM could be a CHW.

Identified functions are not intended to be prescriptive or comprehensive, as the CHW role, tasks, activities, and scope will necessarily vary by Member, contracting entity, and team composition---as well as CHW skill, experience, and certifications (for example, more experienced CHWs know how to address more of these functions).

As part of their role in ECM Core Services, CHWs can facilitate identifying Member eligibility for and connection to ILOS, for those MCPs planning to implement ILOS. The chart details how that role can be integrated into the CHW's role for ECM, just as CHWs can support identifying Member eligibility for and connection to other local community-based services.

TERM	DEFINITION
Behavioral Health Provider	<i>Entities providing behavioral health services.</i>
California Advancing and Innovating Medi-Cal (CalAIM) Initiative	<i>CalAIM is a multi-year initiative by the California Department of Health Care Services to improve the quality of life and health outcomes of our population by implementing broad delivery system, program, and payment reform across the Medi-Cal program.</i>
Community-Based Organization (CBO)	<i>CBOs that work in partnership with healthcare entities often provide nonclinical services that address health-related social needs.</i>
Community Health Workers (CHWs)	<i>CHWs are frontline public health workers who are trusted members of and/or have an unusually close understanding of the community served. This trusting relationship enables the CHW to serve as a liaison, link, or intermediary between health/social services and the community to facilitate access to services and improve the quality and cultural competence of service delivery.</i>
Enhanced Care Management (ECM)	<i>ECM is a proposed benefit requirement in CalAIM to provide intensive and comprehensive care management to address the clinical and nonclinical needs of high-need Medi-Cal beneficiaries enrolled in managed care plans (MCPs).</i>
Health Homes Program (HHP)	<i>The Health Homes Program (HHP) is a pilot that provides comprehensive care management and care coordination for Medi-Cal beneficiaries with complex medical needs and chronic conditions. The program first launched in 2019 and will be replaced by the proposed ECM benefit beginning in 2022.</i>
In Lieu of Services (ILOS)	<i>In Lieu of Services (ILOS) are an optional managed care plan benefit proposed in CalAIM. ILOS are flexible wrap-around services that are designed to serve as a substitute to, or to avoid, other Medi-Cal covered services such as an emergency room utilization or a hospital or skilled nursing facility admission, or a discharge delay. Examples of ILOS include housing transition navigation services, sobering centers, and respite services.</i>
Interdisciplinary Team	<i>Team members with whom the CHW/P coordinates regularly. The types of positions included on the interdisciplinary team will vary based on the setting that the CHW/P works within and the focus of the respective program.</i>
Medi-Cal	<i>Medi-Cal is California's Medicaid program.</i>
Primary Care Provider	<i>Entities providing primary medical services.</i>
Promotores de salud or promotores	<i>Promotores are a subset of community health workers who serve Spanish-speaking communities and are characterized as lay health workers with the ability to provide culturally appropriate services informed by their lived experiences.</i>
Wellness and Recovery Action Plan (WRAP)	<i>WRAP is an evidence-based, self-designed prevention and wellness process that anyone can use to get well, stay well, and make their life the way they want it to be. It is used by people in all kinds of circumstances, and by healthcare and mental health systems all over the world to address all kinds of physical, mental health, and life issues.</i>
Whole Person Care (WPC)	<i>The Whole Person Care (WPC) Pilots provide coordinated and integrated medical care, behavioral health and substance use care, and social services to the Medi-Cal beneficiaries who repeatedly use multiple and often acute services and have poor health outcomes. These pilots first launched in 2017 and will be replaced by the proposed ECM benefit beginning in 2022.</i>
